

NATNAEL FEKADU HUNDE

Junior Full-Stack & Mobile Developer

Bahir Dar, Ethiopia | +251 903 123 870 | natanelfk@gmail.com | github.com/Nattyfikadu | linkedin.com/in/natnael-fikadu-aa59b4213

PROFESSIONAL SUMMARY

Software Engineering graduate (Bahir Dar University) who has independently shipped three full-stack web applications and one AI-assisted finance app spanning React, Node.js/Express, MongoDB, and Flutter. Comfortable owning a feature end-to-end — from UI design and REST API design through database schema modeling and deployment-ready debugging. Looking to join a product engineering team as a Junior Full-Stack, Frontend, Backend, or Mobile Developer to build production software and grow under experienced engineers.

TECHNICAL SKILLS

Languages	JavaScript, Dart, Java, HTML5, CSS3
Frontend	React, Vite, Chakra UI, Tailwind CSS, Responsive Web Design, Component-Based Architecture
Backend	Node.js, Express.js, REST API Design, JWT Authentication, Input Validation
Database	MongoDB, Mongoose (schema design, aggregation, indexing basics)
Mobile	Flutter, React Native (cross-platform), Android Development
Tools & Workflow	Git, GitHub, Postman, Figma, VS Code, MongoDB Compass, Agile/Scrum Collaboration

PROJECTS

Ge'ez Verb Derivation Tool — *Internship Project*

[React](#) · [Vite](#) · [Chakra UI](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#)

- Engineered a full-stack tool that generates Ge'ez word derivations from root verbs and grammatical rule selections, consumed by a rule-based derivation engine driven by structured JSON rule files
- Built a REST API layer connecting the React frontend to the derivation engine, handling request validation and structured JSON responses
- Designed responsive UI flows for root input, rule selection, result display, and word-history browsing
- Implemented MongoDB-backed persistence for word history, enabling users to retrieve past derivations
- Improved UX with loading states, clear result formatting, and mobile-responsive layouts

AI-Based Personal Financial Management System

[React](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [Flutter](#)

- Built a cross-platform personal finance app for tracking income, expenses, and spending patterns, with a Flutter mobile client and React web client sharing a common backend
- Designed and implemented RESTful API endpoints for user authentication and transaction CRUD operations
- Modeled relational transaction/category data in MongoDB with well-structured Mongoose schemas
- Explored AI-assisted spending analysis to generate budgeting insights and surface spending trends to users
- Applied full-stack practices including frontend-backend integration, input validation, and systematic debugging

Campus Complaint Management System

[React](#) · [React Native](#) · [Vite](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#)

- Built a digital complaint reporting platform enabling students, staff, and visitors to submit and track campus issues across dormitories, cafeterias, HR, and faculties
- Delivered both a React web app and a companion React Native mobile app sharing the same backend, so users could submit and track complaints from either platform
- Added anonymous submission support to lower the barrier for privacy-conscious users
- Developed an admin dashboard for responsible offices to organize, filter, and resolve submitted complaints
- Implemented file attachment handling supporting image and video uploads via multipart form data
- Resolved API, frontend integration, and database connectivity issues through systematic debugging

EDUCATION

B.Sc. in Software Engineering — Bahir Dar University, Bahir Dar, Ethiopia

GPA: 3.16 / 4.00 | National Exit Exam: 61.2%

ADDITIONAL STRENGTHS

- Translates project requirements into functional interfaces and working application features
- Learns unfamiliar tools quickly through documentation, testing, and iterative problem-solving
- Focused on building useful, maintainable products with clean, readable code
- Collaborative and adaptable, with strong motivation to grow in a team-oriented engineering environment
